Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book ***** Print on Demand *****.Excerpt from Insect Transformation So many great names are enshrined in the literature of Insect Transformation, that the publication of a new book on the familiar theme may appear hazardous if not presumptuous. And as with lapse of time the literature accumulates, a well-balanced treatment of the subject becomes increasingly difficult. In this - volume designed to serve as an introduction to the study of growth and change in the life of insects - the author has sought, while re-telling many well-known stories, to call attention to some structural details that have hitherto escaped mention in text-books, and to discuss the relation of such details to the wider problems of insect life-histories. He ventures, therefore, to hope that the book may be of some service to serious workers in entomology as well as to beginners. Descriptions of the form of adult insects are given only in so far as is necessary to elucidate the structure of larvae, pupae, and immature stages generally. No attempt has been made to compile a bibliography, but references are given to books and papers to which the writer is indebted, and full lists of titles are to be found in many of these. Especial acknowledgment is due to the writings of A. S. Packard, L. C. Miall, L. F. Henneguy, J. H. Comstock and R. J. Tillyard. The source of every borrowed illustration is indicated in its title, and the thanks of the author and publishers are rendered to the United States Department of Agriculture, the Cambridge University Press, and the Royal Dublin Society, for the loan of blocks. The Cambridge Press has generously allowed the use of several figures from the author...
