

High Energy Spin Physics

Filesize: 2.33 MB

Reviews

*A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.
(Mitchell Kuhn III)*

Book Condition: New. Publisher/Verlag: Springer, Berlin | Volume 1: Conference Report | Proceedings of the 9th International Symposium Held at Bonn, FRG, 6-15 September 1990 | The 9th International Symposium on High Energy Spin Physics, held in Bonn, 6-15 September 1990, attracted 280 participants from 16 countries. This meeting covered not only fundamental experimental and theoretical spin phenomena but also technological developments in polarized beams and targets. For the first time intermediate energy spin physics with electron machines was discussed extensively. Highlights included the work on polarized high energy electron beams at LEP and TRISTAN and the failure of the standard model in connection with spin phenomena, in particular the growth of the spin asymmetry in violent proton-proton scattering. Also the presentation of different models in connection with the still-unsolved 'proton spin crisis'; and the proposals for four different experiments to determine the spin structure functions caused lively and sometimes controversial discussions. The Organizing Committee would like to thank all speakers for their excellent talks, the conveners for the organization of the parallel sessions, and the International Advisory Committee for their advice. Four workshops preceded the symposium. 160 participants, among them many young physicists, discussed mainly technological spin problems. These papers are published in separate proceedings. We gratefully acknowledge the enthusiastic help of the members of our institute in preparing and running the conference and the workshops, especially Mrs. D. Faßbender, Mrs. E. Wendorf, Mrs. J. Wetzel, and Dr. U. Idschok. | I Plenary Talks.- History of the Development of Polarized Targets.- Precise New High-P?2 Spin Measurements.- Polarization Results from IHEP, Serpukhov.- Experiments with Fermilab Polarized Proton and Antiproton Beams (For the Fermilab E-704 Collaboration).- High P?2 Spin Theories.- Quantum Chromodynamics in Exclusive Processes.- Magnetic Moments of the Baryons: An Experimental Review.- Hyperon Polarization at High Energy.- Experiments...
