Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book ***** Print on Demand *****. Excerpt from Supplementary Work in Arithmetic, Vol. 1: Lines Motive. (Charts 1 and 2.) To necessitate the use of the ruler by the children. To exercise their judgment. (They should first judge the lengths of each line and then verify. In the same way objects in the room, parts of the room, etc., should be measured.) To give tests in the five fundamental operations, viz.: addition, subtraction, multiplication, division, and partition. Too often the study of lines (Long Measure) consists in simply learning the table. Thousands have learned that 12 inches make one foot, 3 feet make one yard, 5 i yards make one rod, without ever having seen anything a rod long, knowing it to be such. The writer speaks advisedly, he having been so informed by teachers from nearly every State in the Union. In fact, it is at the earnest request of these teachers that he sends out this Supplementary Work in Arithmetic, which, at best, is only a suggestion of what may be done in this intensely interesting subject. The first three years in school may be so improved as to make it possible for the children to judge distances and the lengths of objects from an inch to a chain long with almost absolute accuracy. Charts 3, 4, and 5 review the fundamental operations, necessitate careful observation, the comparison of numbers, and make the child familiar with the names of the plane figures which everywhere surround him.
